## PROFESSIONAL SUMMARY

Product Designer with 4+ years of experience designing digital products across fintech, SaaS, AI, enterprise software, and Web3. Skilled in leading products from discovery through delivery by combining user research, product strategy, interaction design, and scalable design systems. Focused on turning complex workflows into intuitive experiences, partnering closely with founders, product managers, and engineering teams to ship products that solve real business and user problems.

## CAREER HIGHLIGHTS

- Designed 8+ digital products across fintech, SaaS, AI, and Web3.
- Conducted user research and interviews with 30+ data professionals to shape product strategy and assessment workflows.
- Led end-to-end product design from product discovery through developer handoff.
- Built scalable design systems and reusable UI libraries adopted across multiple products.
- Collaborated directly with startup founders and engineering teams to deliver production-ready interfaces.
- Designed responsive web applications, dashboards, landing pages, and enterprise platforms.

## CORE SKILLS

Product Strategy • Product Discovery • UX Research • User Interviews • Information Architecture • User Journey Mapping • Interaction Design • Wireframing • Prototyping • Design Systems • Responsive Design • Dashboard Design • Visual Design • Accessibility • Usability Testing • Developer Handoff • Feature Prioritization • Stakeholder Management • Cross-Functional Collaboration • Agile Product Development • Design Thinking

## PROFESSIONAL EXPERIENCE

**Product Manager & Product Designer — Daticks** Dec 2025 – Jun 2026

*Data-skills validation platform for aspiring data professionals*

- Defined product vision, roadmap, and feature prioritization for a data-skills validation platform, aligning stakeholders around strategy and scope.
- Led user interviews and research with 30+ professional data analysts to surface hiring expectations and competency gaps, translating findings into product requirements and user stories.
- Owned end-to-end product design — onboarding, authentication, assessment engine, dashboards, leaderboards, competency reports, landing pages, pricing, and admin portal.
- Built a scalable design system that improved UI consistency and accelerated development velocity.
- Partnered with engineering from discovery through implementation and design QA; led usability testing to drive iterative product improvements.

**Product Designer — Vestpi** Aug 2025 – Nov 2025

*Marketing and digital product agency serving fintech and Web3 startups*

- Designed responsive websites, landing pages, and digital products for multiple startup clients across fintech, Web3, and technology.
- Led discovery sessions with stakeholders to translate business goals and user needs into product requirements.
- Mapped user journeys and produced wireframes through production-ready interfaces.
- Built reusable UI components and design systems, and produced interactive prototypes that accelerated stakeholder approvals.

**Product Designer — Vestpad** Apr 2025 – Jul 2025

*Web3 launchpad ecosystem supporting fundraising, mining, and community engagement*

- Designed end-to-end UX for a token launchpad ecosystem, covering onboarding, token launch, staking, mining, and ambassador programs.
- Designed investor dashboards and wallet interaction flows supporting fundraising and community growth.
- Built reusable UI libraries that improved consistency across the product ecosystem.
- Collaborated directly with blockchain engineers throughout implementation to ensure accurate developer handoff.

**UI/UX Designer — ChainPay** Jan 2025 – Mar 2025

*Global crypto payroll and mass-payment platform*

- Conducted UX research on payroll and treasury workflows to inform design decisions for an enterprise payment platform.
- Designed payroll dashboards, bulk payment flows, and transaction history views, simplifying complex financial workflows into intuitive interfaces.
- Delivered reusable components and developer-ready prototypes in close collaboration with engineering.

**UI/UX Designer — EmitCrypto** Oct 2024 – Dec 2024

*Cryptocurrency operations platform*

- Designed analytics dashboards and administrative interfaces for a crypto operations platform.
- Improved information architecture and reporting experiences, and delivered developer-ready specifications for handoff.

**UI/UX Designer — OzoneChain** Jul 2024 – Sep 2024

*Blockchain ecosystem platform*

- Designed the corporate website and supporting ecosystem pages, improving navigation and information architecture.
- Delivered responsive layouts optimized across desktop and mobile in collaboration with stakeholders.

**UI/UX Designer — LightSpeed** Apr 2024 – Jun 2024

*Cryptocurrency platform*

- Designed responsive website experiences, product pages, and marketing interfaces for a cryptocurrency platform.
- Produced high-fidelity UI and interactive prototypes, improving conversion-focused user journeys in collaboration with developers.

**Social Media Manager — CZC Korea** Jan 2023 – Dec 2023

*Blockchain project community and marketing team*

- Planned and executed digital marketing campaigns and content strategy, coordinating production across multiple channels.
- Partnered with designers to maintain visual consistency and grew community engagement through strategic content initiatives.
